PROFESSIONAL SUMMARY

Motivated Computer Science and Engineering student at Vivekananda Global University with hands-on experience in Java, Python, C++, and frontend development. Strong interest in building practical, user-focused applications with clean interfaces and reliable functionality. Completed technical training in Java, computer fundamentals, and AI, with 3 years of independent video-editing experience that adds strength in visual communication, storytelling, and attention to detail.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering | Vivekananda Global University (VGU), Jaipur

Status: Pursuing

TECHNICAL SKILLS

Programming: Java, Python, C++

Web Development: HTML, CSS, JavaScript, Frontend Development, UI/UX Fundamentals

Tools & Platforms: Git, GitHub, VS Code

Creative: Video Editing, Post-Production, Visual Storytelling

PROJECTS

Home Remedies App — Health & Wellness Application | Frontend / Application Development

- Developed a user-friendly application that organizes home remedies for common health concerns into accessible categories.
- Focused on intuitive navigation and clean UI/UX to help users quickly discover relevant information.
- Applied programming and frontend concepts to structure application logic and user-facing screens.

Technologies: Java, Python, Frontend Development

EXPERIENCE

Intern / Trainee — Code Alpha | Internship / Training

- Gained practical exposure to professional development workflows, assigned technical tasks, and project execution.
- Strengthened problem-solving, learning agility, and ability to work toward defined project requirements.

Freelance Video Editor — Independent | 3 Years

- Produced and edited digital video content from raw footage through final post-production.
- Applied pacing, visual composition, transitions, and storytelling techniques to improve audience engagement.

CERTIFICATIONS

- Java Programming Completion Certificate — Core Java concepts and application logic.
- Introduction to Computer — Fundamentals of computer systems and architecture.
- AI for Everyone — Coursera — Fundamentals of Artificial Intelligence, applications, and real-world impact.

SOFT SKILLS

Problem Solving • Adaptability & Quick Learning • Time Management • Collaboration & Teamwork

CAREER INTERESTS

Software Development • Web Development • Frontend Development • Application Development • Technology & AI
